

## Generalizing: Student Self-assessment Checklist

A generalization states a relationship between two or more concepts.

Student: \_\_\_\_\_ Date: \_\_\_\_\_

<b>Key Skills in Generalizing</b>	<b>Ineffective</b>	<b>Somewhat Effective</b>	<b>Effective</b>	<b>Very Effective</b>	<b>Excellent</b>
I have gathered the essential evidence and key concepts in the data.					
I have identified the common elements and categorized the concepts accordingly.					
I have developed a general statement that links the concepts together, but does not go beyond the data gathered.					
I have identified relationships between the concepts.					
I have identified facts that support the generalization.					
I have checked the generalization against a different set of data.					
Some things that I do well are:					
Some things I can improve are:
